

Van Boekel policy statement

Van Boekel Groep B.V. has structured its organisation and the work activities along the Quality, Health & Safety, and the Environment frameworks. These are fully-fledged and worthy focus areas for management and the employees, and they are an important part of our daily business operations. Van Boekel's policy is aimed at the following key points:

General

- Meet the applicable (legal) requirements;
- Implement continuous improvement in all our processes;
- Put out concise communication about the management system and the associated rules.

Quality

- We strive for an accommodating and equal relationship with our clients;
- We strive for partnership with subcontractors and suppliers who meet our quality criteria;
- Where possible, we align and harmonise our work between all business segments.

Safety

- Sound risk management, so that every person who enters our locations is not exposed to unacceptable risks;
- We strive to prevent personal injury and damage;
- Realisation of a strong safety culture where:
 - Safety is part of every project phase;
 - Every person is aware of their tasks and responsibilities;
 - There is room to address each other's safe and unsafe behaviours;
 - Safety can be discussed openly throughout the entire chain;
 - Safety is described in plans and these plans are upheld;

Environment

- Prevent pollution and environmental incidents;
- Utilise sustainable resources wherever possible;
- We strive for a reduction of CO₂ emissions.

The key points above have been incorporated in the management system, which is certified in accordance with the following standards:

- ISO9001:2015
- ISO14001:2015
- VCA** 2017/6.0
- CO₂ performance ladder level 5
